

Control

N59000

Ultra high performance summer car tires

- New generation tread design for improved performance.
- Precise steering response, better handling, and more grip.
- Low external and in-cabin noise level due to asymmetric pattern.
- Excellent water drainage through directional dispersion grooves.
- Wide shoulder blocks for increased safety, grip, and stability.
- Reduced rolling resistance to decrease fuel consumption and lower CO₂ emissions.
- Recommended for sports vehicles and compact cars.
