High-speed SUV vehicle tires

SUMMER

EU-APPROVED

SUV

- Brand new high-speed pattern for the most demanding vehicles in the SUV segment.
- Modern aggressive design and innovative features ensure precise steering and optimal handling response.
- Enlarged tread surface and reduced shoulder grooves for maximal control.
- Unique asymmetric design ensures even wear and minimal road noise.
- Mixed groove direction and cross-cut siping provide optimal traction and safety.
- The solid center rib ensures directional stability while minimal siping improve high-speed performance.
- Hard V speed rating maximizes the contact with the surface of the road.
